THE NATIONS OF THE WORLD HAVE COME TOGETHER TO ANNOUNCE A HISTORIC ACHIEVEMENT-

SAYS OBAMA ABOUT COP21 AMBITIOUS ACCORD

Paris, Washington DC, 16.12.2015, 02:57 Time

USPA NEWS - "I imagine taking my grandkids, if I'm lucky enough to have some, to the park someday, and holding their hands, and hearing their laughter, watching a quiet sunset, all the while knowing that our work today prevented an alternate future that could have been grim; that our work, said Preient Obama.

"I imagine taking my grandkids, if I'm lucky enough to have some, to the park someday, and holding their hands, and hearing their laughter, and watching a quiet sunset, all the while knowing that our work today prevented an alternate future that could have been grim; that our work, here and now, gave future generations cleaner air, and cleaner water, and a more sustainable planet. And what could be more important than that?" President Obama said.

IT IS A HISTORIC MOMENT AND WE HAVE SUCCEEDED-----

Today, nations of the world have come together to announce a historic achievement: the most ambitious global agreement to combat climate change.-----

The Paris Agreement establishes a long term, durable global framework to reduce global greenhouse gas emissions. For the first time, all countries commit to putting forward successive and ambitious, nationally determined climate targets and reporting on their progress towards them using a rigorous, standardised process of review.

IT IS AN AGREEMENT WITH A STRONG MESSAGE TO THE WORLD AND THE US ARE INVOLVED IN THE PROCESS TO FIGHT CLIMATE CHANGE-----

Under President Obama, we've already taken the lead on the world stage. The President's Clean Power Plan will cut emissions from the U.S. power sector -- which makes up a third of U.S. emissions -- by more than 30 percent by 2030 and save more than \$50 billion in climate and health-related costs in the process. It's the largest step the United States has ever taken to combat climate change. And under his leadership, other countries are following suit. China, Brazil, and more than 180 countries representing nearly 95% of global emissions have announced climate targets, or Intended Nationally Determined Contributions (INDCs).
